

EXPLANATION

- SEDIMENTARY ROCKS
- Quaternary
 - Unconsolidated sand, clay, and boulders
 - Volcanic ash, coarse pumice, and cinders
- Cretaceous
 - Sandstone, conglomerate, and shale
 - Chignik formation (Sandstone, shale, and coal)
- Jurassic
 - Naknek formation (Conglomerate, shale, and sandstone)
 - Shelikof formation (Sandstone, shale, and conglomerate)
 - Kialagvik formation (Shale, sandstone, and conglomerate)
- Triassic
 - Sandstone and shale, locally calcareous
 - Thin-bedded limestone and shale
- IGNEOUS ROCKS
- Chiefly andesite basalt, and volcanic breccias
